

Lewis Summers

Junior Software Developer

(804)-380-0284
Midlothian, VA 23114
lewisgraysummers@gmail.com

I'm a passionate and driven software developer with experience in web development, backend architecture, and IT support. I currently attend CodeRVA Regional High School and am on track to complete my Associate of Science in Computer Science through dual enrollment at J. Sargeant Reynolds Community College. I've worked as a Software Development Intern at CorgiBytes, where I used Javascript, Next.js, and C# to aid in product development. Additionally, my role at Nexus Impact Services has given me hands-on experience in startup and fast paced work environments, troubleshooting technical issues, and working with WordPress and Python.

I'm eager to transition into a junior developer role where I can continue growing my skills, contributing to meaningful projects, and collaborating with a team. My adaptability, problem-solving mindset, and dedication to learning make me a strong candidate for an entry-level software development position.

PROFESSIONAL EXPERIENCE

Software Development Intern at CorgiBytes (June 2024 - September 2024)

- Gained experience collaborating with a team to complete assigned tasks and working independently to meet project goals. Built strong problem-solving and organizational skills while contributing to product development. Dedicated time to learning new skills and improving proficiency, showcasing adaptability and a commitment to growth.
- Gained experience using tools like Next.js, C#, and MongoDB. Dedicated time to learning new technologies and improving proficiency, demonstrating adaptability and a commitment to growth.

Product Development + IT Support at Nexus Impact Services (2023 - Present)

- Nexus Impact Services is a startup company so my job extends far beyond my job title. Some of my responsibilities and skills required include: Troubleshooting/Problem Solving, Effective Written Communication, Completing Work before a Deadline, Computer Science Skills, Working as a Team.
- Gained experience with startup culture and a fast paced work environment. Wordpress Website Development, Python, Backend and Production Deployment Architecture.

EDUCATION

CodeRVA Regional High School (2021 - 2025)

CodeRVA is a computer science focused high school that emphasizes workplace readiness skills like time management and professional communication. I currently have a 3.9 unweighted GPA and a 4.1 weighted GPA. I graduate in May 2025.

J. Sargeant Reynolds Community College (2023 - 2025)

I am enrolled in J. Sargeant Reynolds Community College via Dual Enrollment Classes through my high school. I am currently in progress of completing my Associates of Science with a Computer Science Specialization. I graduate in May 2025.
